

CONVERTING YOUR FLEET FOR CARB COMPLIANCE

Our turnkey process minimizes operational impact while ensuring CARB compliance

Engine Control Systems' (ECS) unique fleet conversion process is managed by our authorized distributors and our in-house CARB compliance specialists – ensuring full compliance with CARB requirements while optimizing productivity of your fleet operations.

ECS 4-STEP CONVERSION PROCESS

1. Review your fleet's emission reduction requirements

- a. Inventory fleet equipment
 - i. Vehicle manufacturer and model
 - ii. Engine manufacturer, model, horsepower and engine family
 - iii. Application for each vehicle
- b. Calculate retrofit needs based on CARB mandates and emissions technology
 - i. Overall compliance requirements
 - ii. Determine vehicles requiring retrofit and compliance timing

2. Measure your fleet's applications and usage patterns

- a. Identify retrofit vehicles based on fleet business practices and usage
- b. Review vehicle inventory to determine system sizing and CARB compliance criteria
- c. Select vehicles to have temperatures measured and logged, based on CARB requirements
- d. Install data-logging units and monitor progress

3. Prescribe solutions that meet requirements and optimize your fleet operations

- a. Evaluate vehicle temperature measurement data on selected vehicles
- b. Identify optimum solutions for fleet equipment
 - i. Ensure compliance with applicable CARB mandates
 - ii. Provides best performance and minimum impact on fleet operations
- c. Analyze filter installation(s) for optimum configuration

4. Retrofit your fleet and provide all required compliance information

- a. Install prescribed systems and verify proper function
- b. Report to CARB that your Level III Emissions Control Devices were properly installed
- c. Provide you with applicable compliance documentation for your files

To get your fleet started down the road to CARB compliance, or to learn more about CARB compliant diesel emission systems, please feel free to contact an ECS compliance specialist at 1-800-331-9247 or via email at ecs@enginecontrolsystems.com.
